2039. (Amended) A method of treating a coal formation in situ, comprising:
providing heat from one or more heat sources to at least a portion of the formation;
allowing the heat to transfer from the one or more heat sources to a selected section of the formation;
wherein the selected section has been selected for heating using a moisture content in the selected section, and wherein at least a portion of the selected section comprises a moisture content of less than about 15 % by weight; and
producing a mixture from the formation.

2078. (Amended) A method of treating a coal formation in situ, comprising:
providing heat from one or more heat sources to a selected section of the formation;
allowing the heat to transfer from the one or more heat sources to the selected section of the formation;
wherein at least a portion of the selected section has an initial moisture content of less than about 15 % by weight; and
producing a mixture from the formation.
